Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE \_\_\_\_ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-20, 23-26 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,800,721 to McBride. McBride discloses a blood reservoir with a housing 12, cardiectomy inlets 32, a venous blood inlet 34, a nonwoven defoamer/filter 152 that has separate passages of differing volumes for separate flow (see columns 4 and 6, FIG 2). The device may further comprise a defoaming agent that is applied to the filter (see column 12).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 21-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,800,721 to McBride. McBride discloses the invention as claimed with the exception of the location of the antifoaming agent. It would have been obvious to one of ordinary skill in the art at the time of invention to place the defoaming agent either below

Art Unit: 3762

or above the maximum blood level in the reservoir, since it has been held that rearranging parts of an invention involves only routine skill in the art. See MPEP 2144.04.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- a. US 5,919,153                      Van Driel
  - i. Venous reservoir with cardiotomy section
- b. US 6,475,176                      Fini
  - ii. Combined cardiotomy venous blood reservoir with filter
